SUMMARY

Java Full Stack Developer with **3 years of experience** delivering backend services and user interfaces across enterprise and cloud-based systems. Improved system response times, reduced deployment cycles, and enhanced performance for real-time and transactional platforms. Contributed to secure access management, automated workflows, and data-driven feature releases. Worked on multiple customer-facing applications, supporting high-volume usage with stable architecture and efficient interfaces.

TECHNICAL SKILLS

Programming Languages: Java (11/17), JavaScript (ES6+), Python, C++, C
Front-End Technologies: React 18, Redux, HTML5, CSS3, Tailwind CSS, styled-components, Bootstrap, Material UI, shadcn/ui, jQuery, EJS, CSS Modules
Back-End & Server-Side: Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Node.js, Express.js, REST APIs, GraphQL APIs, ebSocket (Socket.io)
Databases: PostgreSQL, MySQL, MongoDB, H2
DevOps & Cloud Platforms: AWS (EC2, ECS, EKS, Lambda, S3, RDS), Docker, Kubernetes, Jenkins, GitHub Actions, Terraform
Authentication & Security: JWT, OAuth 2.0, Clerk, bcrypt
Tools & Workflow: Git, GitHub, GitLab, Postman, Jira, Agile/Scrum, IntelliJ IDEA, VS Code, npm, pnpm, Vite, Figma
Testing & Automation: Jest, React Testing Library, Automated Testing (Spring Boot & REST), CI/CD pipelines
Other Integrations: Stripe (Payments), Multer & Cloudinary (Media Uploads)

PROFESSIONAL EXPERIENCE

Comcast, FL, USA **Feb 2025 – Current**

Java Full Stack developer

- Developed and maintained 12+ scalable microservices using Java 17 and Spring Boot, handling over 100,000 daily API requests with 99.98% uptime across production and staging environments.
- Built and deployed 6 containerized applications with Docker and Kubernetes on AWS ECS, reducing server provisioning time from 45 minutes to under 10 minutes using infrastructure-as-code via Terraform.
- Integrated JWT and OAuth 2.0 authentication across 3 platforms, enabling secure multi-role user access and reducing unauthorized access attempts by 60% over a 6-month monitoring period.
- Automated CI/CD pipelines using GitHub Actions and Jenkins, reducing deployment failures by 50% and bringing down release cycle time from two weeks to three days across all environments.
- Created 20+ front-end components using React 18, Tailwind CSS, and Redux, improving average page load speed from 2.8 seconds to 1.4 seconds and reducing UI bugs by 35%.
- Configured payment and file services using Stripe, Cloudinary, and Multer, reducing integration time by 30% and supporting daily transactions averaging \$25,000 across multiple customer-facing portals.

Accenture, India **May 2020 - Dec 2022**

Java Full Stack developer

- Implemented backend modules with Java 11 and Spring MVC for 4 client applications, reducing response times from 900ms to 300ms through caching, query tuning, and optimized controller logic.
- Delivered 15+ dynamic UI pages using React, Bootstrap, and jQuery, improving user task completion rates by 28% based on A/B testing across different interaction flows and visual layouts.
- Designed PostgreSQL and MongoDB schemas for three enterprise products, reducing duplicate data storage by 45% and improving average data retrieval speed by 60% in analytics modules.
- Created real-time features with Node.js, Express.js, and Socket.io, enabling instant updates for chat and notification services used by over 20,000 concurrent users during peak load periods.
- Managed deployments and configuration using Jenkins and GitLab across dev, QA, and staging, improving code stability and reducing rollback occurrences from weekly to once per quarter.
- Collaborated on Agile teams using Jira and Postman, executing over 100 test cases per sprint and improving sprint completion rates from 70% to consistently over 95% in final year.

EDUCATION

Master of Science in Computer Science **Dec 2024**

Florida International University, Miami, Florida, USA

PROJECTS

TriedAndTested ([LINK](#))

- Designed a full-stack blogging platform using React 18, Node.js, and MongoDB with Clerk-based authentication and DeepAI image generation, increasing user engagement by 50% and interaction by 20%.
- Integrated TanStack Query for efficient data fetching and optimized performance with Vite, styled-components, and Tailwind CSS, reducing page-load times by 10% and ensuring responsive UI across devices.

Project Management Tool ([LINK](#))

- Created a modular project management system with Java, Spring Boot, and H2 database using layered architecture and custom logic to monitor team and project performance.
- Developed UI components using Thymeleaf and vanilla CSS/JS, and built secure RESTful APIs with role-based access, along with automated test coverage for maintainable and secure deployment.

SocialCart ([LINK](#))

- Built a real-time e-commerce platform with React, Redux, Socket.io, Node.js, and MongoDB, enabling collaborative shopping features that raised user engagement by 40%.
